10-32 Rack Screw *1421D Series*

Economical 10-32 rack mounting screws for threaded rack rails. Ideal for tightly spaced rack equipment and applications where cup washers are not required.

TAA COMPLIANT

RoHS

Key Features and Benefits

- Zinc-plated 10-32 steel screws provide a dependable and economical solution for mounting equipment to threaded rack rails.
- Low-profile pan head design is ideal where multiple adjacent 1U panels are installed and cup washers would interfere with neighboring equipment.
- Slotted and Phillips combination drive allows installation with either a flat-blade or Phillips screwdriver.
- Cost-effective choice for standard rack installations where decorative washers or pilot points are unnecessary.
- Zinc-plated finish helps resist corrosion in commercial and industrial environments.
- Available in convenient 25-piece and 100-piece packages for installers, maintenance departments, and OEM production.
- Compatible with standard 10-32 threaded rack rails commonly used in telecommunications, networking, industrial, and AV equipment.
- REACH compliant.

The 1421D Series provides an economical solution for mounting equipment to standard 10-32 threaded rack rails. Its low-profile pan head design makes it particularly well suited for applications where multiple 1U devices are mounted side by side, eliminating the interference that can occur with cup washers while maintaining a clean, secure installation.

Whether you're installing patch panels, cable managers, shelves, or other rack-mounted equipment, the 1421D Series delivers reliable performance at an economical price. Available in multiple package sizes, it's an excellent choice for OEM production, maintenance departments, and high-volume rack installations.

When Another Product May Be a Better Choice

- When you want faster alignment and easier installation, choose the **SCREW** Series Rack Mounting Screws with pilot points.
- When you need tool-free installation and frequent equipment removal, choose the **TSCREW** Series Thumb Screws.

Part No.	Qty Included	Screw Length
1421D	25 screws	0.50
1421D100	100 screws	0.50

Where the 1421D Series Works Best

- Threaded 10-32 rack rails.
- High-density racks with multiple adjacent 1U devices.
- Telecommunications and networking installations.

Best Applications

- Mounting patch panels and blanking panels.
- Installing cable management accessories.
- Securing lightweight rack equipment.

- AV and broadcast equipment racks.
- OEM production and rack assembly.
- Maintenance departments and service technicians.
- Replacing missing or damaged rack screws.
- Large rack deployments where economical hardware is preferred.
