Cable Ladder Rack End Cap Protective Plug *CLEP Series*

Set of two (2) plastic end caps designed to cover exposed ladder rack ends and protect cables from damage.

MANUFACTURED IN NORTH AMERICA

RoHS

Key Features and Benefits

- Molded low-density polyethylene construction provides durable, long-term protection for ladder rack ends and exposed edges.
- Internal rib design creates a secure interference fit inside the tube, preventing loosening or fall-out over time.
- Ribbed design installs cleanly without shaving or material deformation, unlike friction-fit or vinyl sleeve alternatives.
- Provides a firm mechanical grip that resists vibration and handling common in ladder rack systems.
- Helps protect fiber, copper, and coax cables from abrasion at ladder rack termination points.
- Superior durability compared to typical vinyl sleeves that can crack, loosen, or degrade over time.
- Clean, finished appearance improves overall installation quality.
- Simple push-in installation allows fast deployment without tools.
- Compatible with standard ladder rack tube dimensions for broad application.
- Manufactured in the USA and supports government procurement requirements and ensures consistent quality.
- Material supports compliance with RoHS requirements.

The CLEP Series ladder rack end caps provide a durable solution for protecting cables and improving safety at ladder rack termination points. Designed as a superior alternative to vinyl sleeves, they offer a secure fit and long-term reliability.

By covering exposed tube ends, these end caps help prevent cable damage, reduce safety risks, and deliver a clean, professional installation.

Part No.	CLEP

Where the CLEP Series Works Best

- Data centers and server rooms
- Telecom and network installations
- Structured cabling environments
- Ladder rack systems and cable runway installations
- Any installation requiring cable protection at termination points

Best Applications for the CLEP Series

- Improving safety at exposed rack ends
- Replacing worn or loose vinyl sleeves
- Completing ladder rack installations with a clean finish
- Supporting fiber and high-performance cable protection
