Key Features and Benefits

- 16-gauge steel construction (50 lb **capacity**) supports light-duty IT, AV, and general equipment.
- Universal design mounts to any standard 19-inch EIA-compliant rack or cabinet.
- Fixed-depth shelf provides simple, reliable support for non-rackmount equipment.
- Available in solid and vented configurations to support airflow or surface support needs.
- Downward-facing lips improve strength without interfering with mounted equipment.
- Can be mounted internally as a shelf or externally as a work surface for added flexibility.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The RB-SHELF Series rack shelf provides a simple and cost-effective solution for supporting non-rackmount equipment in standard 19-inch racks and cabinets. Designed for light-duty applications, it offers universal compatibility and reliable performance in IT, AV, and general-purpose environments.

With a fixed-depth design and durable steel construction, the RB-SHELF Series is ideal for installations that require straightforward equipment support without the need for advanced configurations. Solid and vented options allow users to select the appropriate balance of airflow and surface support.

When Another Product May Be a Better Choice

- When you need higher load capacity or heavier-duty support, consider our **RAS** Series.
- When you need sliding shelf functionality for rear equipment access and serviceability, consider our **RSP** Series.
- When you need a rack-mounted workspace or operator interface, consider our **RMD**, **RKBM**, **WMD**, or **RMS** Series.

Where the RB-SHELF Series Works Best

- Small IT and network installations.
- AV and media setups.
- Telecom and low-voltage applications.
- Equipment staging and test environments.
- Budget-conscious rack deployments.

Best Applications for the RB-SHELF Series

- Supporting lightweight non-rackmount equipment.
- Mounting small AV components or peripherals.
- Providing basic shelf support within racks and cabinets.
- Adding simple work surfaces inside rack systems.
